**May 4 - 7, 2014**  
*Disney's Coronado Springs Resort*

# **AS13: Restraint and Seclusion: Effective Alternatives to Avoid Costly and Dangerous Practices**

**Joseph B. Ryan, Ph.D.**  
**Clemson University**

**Tues., May 6 – 1:15-2:30pm**  
**Wed., May 7 – 9:45-11:00am**

# Today's Presentation

Highlight research-supported de-escalation strategies and procedures designed to prevent and de-escalate students' aggressive behavior, including:

## 1. Curriculum-Based Strategies

- \* *Second Step*
- \* *Peaceable School*

## 2. Behavior Support Strategies

- \* *School-wide Positive Behavior Supports*

## 3. Relaxation-Based Strategies

- \* *Creating cool down or multisensory rooms*
- \* *Teaching relaxation techniques*

## 4. Conflict De-escalation strategies

- \* *The Conflict Cycle*
- \* *The Acting-Out Cycle*

# 3 Types Of Restraint Procedures

<b>Mechanical</b>	Use of any device (tape, tie-downs) to limit an individual's body movement.	Limited use in schools — with a few exceptions, not permitted.
<b>Chemical</b>	Use of medication to control behavior or restrict a patient's freedom of movement.	Not used by schools; however, many students may be on medication in schools.
<b>Physical</b>	Use of one or more people using their bodies to restrict another's movement.	Can be used given certain criteria are met.

# 3 Types Of Timeout- Only One Of These Is Seclusion

Time out: Time away from positive reinforcement.

## Inclusion timeout

- Inside the classroom

## Exclusion timeout

- Outside the classroom

## Seclusion timeout

- Involuntary confinement of a student alone in a room or area, which the student is physically prevented from leaving

# Why Have Seclusion & Restraints Garnered So Much Attention Recently?

- **Number of students with serious behavior issues served in regular school settings has increased dramatically**
- **Problems may arise when students with E/BD are integrated into general education classes/schools where staff lacks expertise needed to prevent and manage student conflict and other behavior problems**
- **Ineffective educational programming (e.g., failure to provide appropriate curricular, instructional, or behavioral interventions) may exacerbate behavioral difficulties of some students, leading to vicious cycle of antecedents that set the stage for problem behavior**
- ***Hundreds of cases of alleged abuse and death related to the use of seclusion and restraint (GAO, 2009)***

What are the risks and dangers of “restraint” and “seclusion”?

# Risks Associated With Seclusion

- **Potential death or injury due to:**
  - *Lack of supervision*
  - *Inadequate safety of environment*
- **Procedure is not therapeutic and might actually escalate behavior:**
  - Students consistently perceived timeout procedures as punishment, especially when used as a threat for “bad” behavior (Miller, 1986)
- **Potential for abuse**
- **Potential disparity of treatment:**
  - Disproportionate number of African-Americans (67%) separated from class (Vacc & Siegel, 1980)
  - General and special education teachers more likely to use punishment and exclusion with Asian-American students (Ishii-Jordan, 2000)

# Risks Associated With Physical Restraint

## Death or physical injury to students

### Breathing problems

Positional asphyxia: predisposed when in prone (facedown) position

Aspiration: predisposed when in supine (faceup) position

### Circulation/cardiac problems

#### Blunt trauma to the chest:

**Cardiac arrhythmia** leading to sudden death

**Catecholamine rush:** Escalating agitation creates heart-rhythm disturbances

**Rhabdomyolysis:** break down in muscle cells due to strenuous exertion

**Thrombosis:** fatal pulmonary embolism due to being immobile for long periods of time

**Physical injury to students and staff**

**Psychological trauma for students and staff**

## Restraint And Seclusion Frequently Used For Reasons Other Than Emergencies

<i>Staff Reasons Stated For Using Restraint</i>	<i>Staff Reports</i>
1. Noncompliance	48.4%
2. Leaving Assigned Area	19.4%
3. Disrespect	7.3%
4. Property Misuse	7.3%
5. Disrupting Class	6.5%
<b>6. Physical Aggression</b>	<b>3.2%</b>
7. Threats	3.2%
8. Horseplay	3.2%
9. Harassment	0.8%

<i>Staff Reasons Stated For Using Seclusion</i>	<i>Staff Reports</i>
1. Leaving Assigned Area	32.6%
2. Noncompliance	31.9%
3. Disrupting Class	11.2%
4. Property Misuse	10.1%
5. Disrespect	4.5%
<b>6. Physical Aggression</b>	<b>2.8%</b>
7. Harassment	2.4%
8. Threats	2.0%

*Source: (Ryan, Peterson, Tetreault & Van der Hagen, 2007).*

What are effective alternatives to “restraint” and “seclusion”?

## Curriculum-Based Strategies: *Second Step*

**Research-based violence prevention program  
designed for school-wide use**

- K through 8<sup>th</sup> grade in boxed kits
  - Middle school also addresses substance abuse
- Family involvement and guide
- Classroom implementation
  - Posters
  - DVDs
  - Songs

## Curriculum-Based Strategies: *Second Step* — Major Components

### 1. Empathy training

- Students learn how to identify feelings, interpret how others feel, and show others they care

### 2. Problem-solving

- Students learn to control impulses, use basic social skills and, negotiate with others

### 3. Anger management

- Students learn to calm themselves, evaluate their actions, and think positively

## Curriculum-Based Strategies: *Second Step* — Goals

### **1. Increase students' ability to:**

- a) Identify others' feelings
- b) Take others' perspectives
- c) Respond empathically to others

### **2. Decrease impulsive and aggressive behavior in students through:**

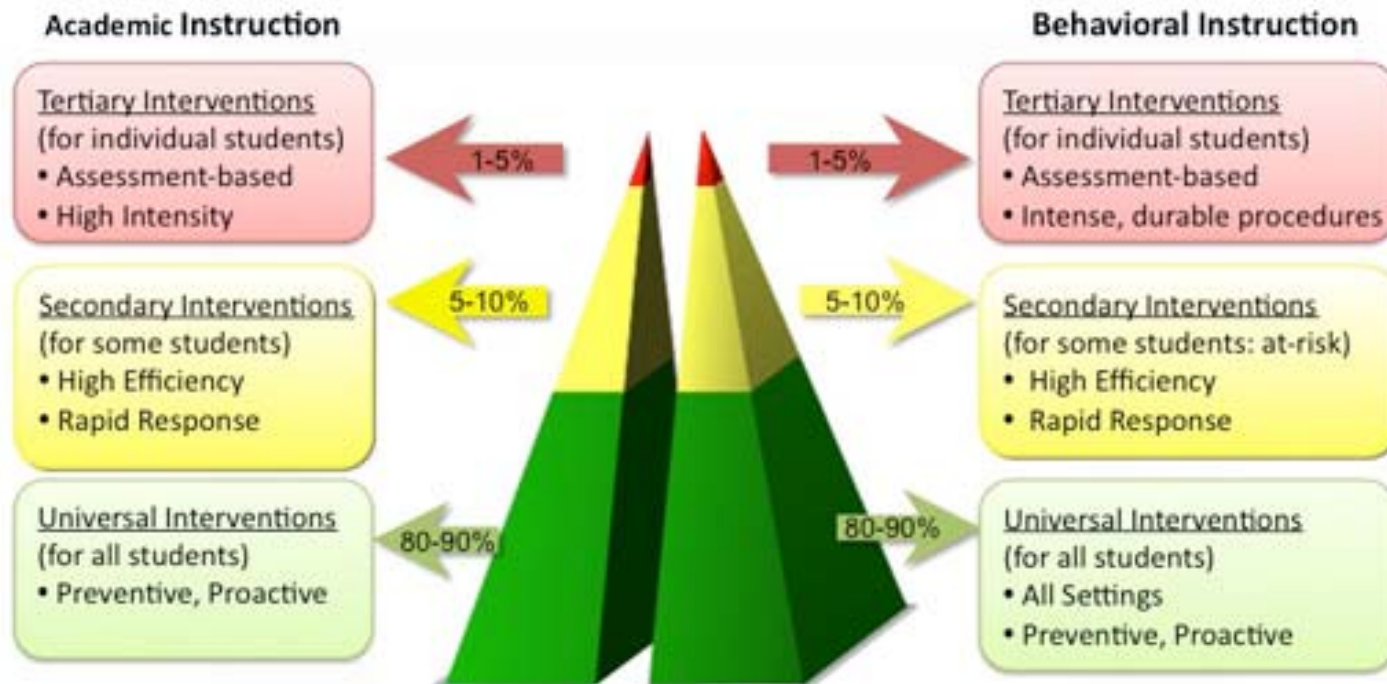

- a) Recognizing warning signs that fuel anger
- b) Using anger-reduction techniques
- c) Applying a problem-solving strategy to social conflicts
- d) Practicing social skills to deal with potentially violent situations

## Curriculum-Based Strategies: *The Peaceable School*

- *Creating the Peaceable School: A Comprehensive Program for Teaching Conflict Resolution*
  - Richard Bodine, Donna Crawford & Fred Schrumpf
  - Based on William Kreidler's *Conflict Resolution*
- **Grades:** Upper elementary and middle school students
- **Goal:** Help students learn to recognize, manage, and resolve conflicts in peaceful, non-coercive ways
- **Activities:** Teaches conflict resolution strategies, including mediation, negotiation, and group problem-solving
- **Implementation in select TN schools:**  
[www.ncjrs.gov/html/ojjdp/jjournal\\_2001\\_6/jj3.html](http://www.ncjrs.gov/html/ojjdp/jjournal_2001_6/jj3.html)

# Behavior Support Strategies: School-Wide Positive Behavior Supports

## Designing Schoolwide Systems for Student Success

## **Behavior Support Strategies: Common Intervention Strategies**

- 1. Make curricular adaptations**
- 2. Increase predictability and scheduling**
- 3. Increase choice-making**
- 4. Teach replacement skills**
- 5. Appreciate positive behaviors**
- 6. Alter environments**
- 7. Change systems**

Adapted from the Beach Center on Families and Disability, University of  
Kansas

# Behavior Support Strategies: Common Intervention Strategies

## 1. Make curricular adaptations

- Consider nature of task, including how it is presented/monitored
- Provide peer support

## 2. Increase predictability and scheduling

- Consider using (and sticking to) schedules
- Prepare learners for changes and transitions

## 3. Increase choice-making

- Assess choice-making skills
- Identify types of choices available
- Provide proactive opportunities for choice
- Honor choices made

## 4. Teach replacement skills

- Use functional assessment results as guide
- Choose skill that is as effective/efficient as the challenging behavior

# Behavior Support Strategies: Common Intervention Strategies

## Appreciate positive behaviors

- Develop attitude and behavior to respond to appropriate behavior
- Maintain 5-to-1 ratio of positive statements
- Embed rewards within activities
- Prepare network members to respond appropriately

## Alter environments

- Consider room arrangement and traffic patterns
- Accommodate individual learner's environmental needs

## Change systems

- Monitor with the goal of continually improving the efficiency and effectiveness of the system

## Relaxation-Based Strategies: Create Other Rooms

### Cool-down room

- Spacious area
- Not locked
- Very little stimuli or creature comforts
- Designed to give students space to calm down and reflect
- Students and staff establish “return to class” criteria

### Snoezlen room

- Multisensory area
- Designed to deliver stimuli to various senses in a calming manner
  - Visual: color, various lighting effects
  - Auditory: sounds or music
  - Olfactory: scents
  - Tactile: textures

## Relaxation-Based Strategies: Teach “Anger” Before It Strikes

### *My anger at others*

- What is anger?
- How often do you get angry?
- How does your body feel/look when angry?
- What do you do when you are angry?
- What are some strategies you use to calm down?
- Are there rewards for acting positively when angry?

### *Other people’s anger*

- How do you know when other people are angry?
- How do you feel when someone is yelling at you?
- Is it okay for someone to call you names? To hit you?
- What are some things you can do to help a person who is yelling without increasing their anger?

Creative Therapy Associates' *Anger Management Comprehensive Curriculum*  
[www.ctrtherapy.com/index.asp](http://www.ctrtherapy.com/index.asp)

# Relaxation-Based Strategies: Teach Relaxation Techniques

- **Visualization**

- Find a quiet space and close your eyes
- Use mental images to take a visual journey to a peaceful, calming place or situation
- During visualization, “use” as many senses as you can, including smell, sight, sound and touch
- For example, I imagine relaxing at the ocean and “smell” the salt water, “hear” the rhythmic sound of crashing waves, “feel” both the breeze and the hotness of the sun on my body

- **Progressive muscle relaxation**

- Slowly tense (5 seconds), and then relax each muscle group (30 seconds) from your neck down to your toes

- **Autogenic relaxation**

- Means “from within”
- Use visual imagery and body awareness
- For example, I imagine an ocean, focus on deep, controlled breathing, while “feeling” my body relax from my toes upward

# Life Space Crisis Intervention (LCSI)

***Life Space Intervention: Talking with Children in Crisis*** (Wood & Long, 1991)

## **Goals:**

1. Respecting children
2. Allowing the children to form trusting relationships with adults
3. Acquiring social skills
4. Taking responsibility for one's self
5. Acknowledging self-defeating behaviors (Long & Fecsar, 2010)

## **•Six different specific interventions in the LSCI process**

- Reality rub
- Red flag
- Symptom estrangement
- Massaging numb values
- New tools
- Manipulation of body boundaries

# Conflict De-Escalation Strategies

## 1. Know the cycles

- The Conflict Cycle
- The Acting-Out Cycle

## 2. Know how to intervene

# Intervening in a Crisis

Every crisis can be analyzed into a series of Conflict Cycles, each of which provides four different points for intervening in a crisis:

- ModifyING the stress
- Alleviating the student's distressed feelings
- Changing the student's behavior
- Changing the behavior of others

## Conflict De-Escalation Strategies: Variables That Affect Compliance

- Provide a single, detailed request
  - Do not use a question format
- Get up close, and look them in the eyes
  - Do not violate their personal space
- Use a quiet and business-like voice
  - Do not show your anger, even if you are angry
- Make your request twice at most
  - Do not argue, bargain, or coerce
- Reinforce compliance
  - Do not rub compliance in the student's face

<b>Student Stage</b>	<b>Student Stage</b>
<b>1. Calm</b>	<b>1. Reinforce appropriate behaviors</b>
<b>2. Trigger</b>	<b>2. Notice What precipitates the problem</b>
<b>3. Agitation</b>	<b>3. “Listen” to the problem</b>
<b>4. Acceleration</b>	<b>4. Clearly set limits</b>
<b>5. Peak</b>	<b>5. Allow the child to vent; remove audience (think safety first!)</b>
<b>6. De-escalation</b>	<b>6. Take a deep breath (allow student time to calm down)</b>
<b>7. Recovery</b>	<b>7. Problem-solve with student(s) and any staff</b>

## **Student Is Cooperative**

- On-task
- Follows rules and expectations
- Responsive to praise
- Socially appropriate

## **Teacher Response In Calm Phase**

- Provide classroom structure
- Provide quality instruction
- Manage attention
- Teach and reward appropriate behaviors

**\*Phase 1 CALM**

## **Student Experiences Unresolved Problems**

- School-Based Triggers
  - Conflicts
  - Denial of something needed
  - Changes in routine
  - Provocations
  - Pressure
  - Interruptions
  - Ineffective problem-solving
  - Academic errors
  - Corrections

## **Teacher Response In Trigger Phase**

- Use pre-correction
- Provide access to formal programs or services
  - e.g., free school meals, counseling services
- Address non-school-based triggers
  - e.g., bullied on way to school

# **Phase 2 TRIGGER**

## Student Is Unfocused Or Non- Directed

- Increase in behaviors
  - Eyes dart
  - Busy hands
  - Off-task
  - Stares into space
  - Withdraws from group

## Teacher Response In Agitation Phase

- Teacher empathy
- Provide space
- Provide options
- Preferred activities
- Teacher proximity
- Independent activities
- Movement activities (as appropriate)
- Relaxation techniques
- Pre-arranged signal

# Phase 3 AGITATION

## Student Behavior Is Directed & Engaging

- Student experiences questioning and arguing
- Noncompliance, defiance
- Off-task
- Provoking other students/teacher
- Compliance with accompanying inappropriate behaviors
- Whining and crying
- Avoidance and escape behaviors
- **Threats and intimidation**
- Verbal abuse

## Teacher Response In Acceleration Phase

- Avoid escalation responses
- Re-direct and maintain on-task behavior
- **Emphasize student choices and responsibilities**
- Utilize non-confrontational limit-setting procedures
- Administer consequences
- Debrief and problem-solve
- Track results

# Phase 4 ACCELERATION

## Student Is Out Of Control & Creating Safety Concerns

- Serious destruction of property
- Assault
- Self-abuse
- Severe tantrums
- Hyperventilation
- Screaming/running/violence

## Teacher Response In Acceleration Phase

- Move slowly and deliberately
- Keep reasonable distance
- Minimize threatening body language
- Speak as little as possible, but use simple language, and be **calm and respectful**
- Acknowledge cooperation
- Withdraw if problems escalate
- Give student space
- Do not communicate “urgency to gain control”

# Phase 5 PEAK

## **Student Displays Confused Behaviors**

- Confusion
- Reconciliation
- Withdrawal
- Denial
- Blaming others
- Sleeping
- Responsive to directions
- Responsive to manipulative or mechanical tasks
- Avoidance of discussion (unless there is opportunity to blame others)

## **Teacher Response In De-Escalation Phase**

- Monitor for health and safety of all involved
- Monitor student for re-escalation of behavior
- Allow time and space
- Provide opportunity for non-judgmental discussion
- Provide easy/concrete tasks
- Determine appropriate time to debrief with student and staff

# **Phase 6 DE-ESCALATION**

## **Student Displays Eagerness For Busy Work & Reluctance To Discuss Situation**

- Eagerness for independent work or study
- Subdued in group
- Subdued in class discussion
- Defensive
- Avoidance of debriefing

## **Teacher Response In Recovery Phase**

- Assist student's return to normal activities and Phase 1: Calm
- Return self to a calm emotional state

# **Phase 7 RECOVERY**
